

Augment Tx-Router

Augment Link application facilitates STP (Straight through processing) for RTGS, NEFT and other interbank payment messages in a highly secured and complaint way as prescribed by Reserve bank of India's guideline. The system at one end gets integrated with Bank's payment systems such as Core banking, cash management system etc and on the other end with central bank's message handling and queuing system.

How we do it

- 1 Seamless integration with all your payment systems
- 1 Complete workflow for transaction approval & exception handling
- 1 Transaction level status monitoring
- 1 Complete audit log for the lifecycle of a transaction
- 1 Customized reports and dashboard
- 1 Strong BPM engine at work at beck-end.

Why Tx-Router

- 1 Lower cost of processing per transaction
- 1 Real time view on process
- 1 Elimination of manual intervention
- 1 Elimination of error
- 1 Elimination of delay in processing
- 1 Complete automation with flexible change management
